

Then Gillian could stay in her own room
and Jean + M^{rs} Russell in my big bed -
Penna either up with Jack or in her own
bed - At the moment Penna is up with
Grace - she sleeps on the settee which
I keep up there now so that one or
other of the children can be sent up
with Grace at a moments notice if the
other one is ill - ~~saves~~ saves infection -
Gillian has been in her own room by
day and in Penna's bed in my room
by night - Penna has seen very little of her
Penna + I have started Aero Calcine
Gillian shall start as soon as she
has finished her bottle of medicine
Dr M gave her - Dr M says she had
better not go to school on Wed - wait
till her cough is gone -

Well as you see arrangements could be
made if you need me - and M^{rs} R
I feel is well aware of the whole position
and Dr M is very much on the spot and
I believe really interested in the case
and charmed with Gillian - By the
way after he had gone over her chest
the other day he asked to see her back

she immediately
put herself in
this position!!!

And did so
afterwards every
time. He said it was "fine but tempting".

Then I've written to May - (am expecting
the answer by Tuesday) - to see if she
would come. But with M^{rs} R here
even if May were willing to come we
need not send for her unless M^{rs} R
wants.

That is - If you want me M^{rs} R will move
in here & I'll come at once - then M^{rs}
R can herself phone for May if she
wants her. May knows the ropes from
last year and had a good deal of
bronchitis with Sylvia when young -
